Prior approval by the appropriate authority for participation in the program must be obtained by the property owner prior to construction of the sidewalk in order to be eligible for support through this program. All sidewalks shall be constructed of concrete, in accordance with the most recently adopted Kansas City Chapter American Public Works Association Standard Specifications and Criteria. Width shall match width to which it abuts. Failure to comply with specifications and/or to receive prior approval for installation or replacement of sidewalks with the City will automatically disqualify the resident or business seeking assistance from the City of any funding or participation from the City. Residential participants have the option of selecting either the reimbursable program or the prepaid program. Commercial participants are eligible only for the reimbursable program. Work performed by Platte City Public Works shall carry a two-year warranty. Reimbursable and pre-paid rates established 3/15/2014.
